

An aerial photograph of a river delta, showing a complex network of channels and islands. The water is a mix of deep blue and light turquoise. A red circle is overlaid on the right side of the image, containing text. The background is split into a dark blue top half and a lighter blue bottom half.

NEW PROGRAM
Starting October
2026

MASTER
ENVIRONMENTAL HUMANITIES

WHAT TO EXPECT ...

The **interdisciplinary master's program Environmental Humanities** combines concepts, theories, and methods from the humanities, social sciences, and natural sciences to better understand the complexities of living in the 21st century. The program focuses in particular on an in-depth engagement with the cultural practices and patterns of thinking that have shaped modern humanity's complicated relationship with its environment.
